

## Simple Binary Encryption Secret Message Worksheet

It is SuperBowl Sunday, and Mr. Dean is looking forward to spending it in front of his HUGE Television! The Colts are playing....Hey, it could happen! He looks in the pantry, and WHAT???.No snacks. He knows he has snacks at school, so he runs over to GMS. He is the only one there, and unfortunately, the doors lock him in. He is TRAPPED on the top floor in his room. No one else is at school, but across the street, he can see a house, and in its window, there's a person working at their computer. How can he attract their attention? He has a brilliant idea! Using his Sphero Balls, he can light up HIS window in a series of blips to send them a message! He gets several SpheroBalls, and sets them up so he can turn their lights on and off. He uses simple Binary code, which he hopes the person across the street can understand. Can you figure it out?  
 ("On" has a tree in it, the dark squares mean "off")
